PROFESSIONAL EXPERIENCE

Caisse des Dépôts GROUPE — BANQUE des TERRITOIRES GROUPE CAISSE DES DÉPÔTS

Dec 2023 - Present

Senior IT Program Manager/Business analyst - Green Finance

As part of Banque des Territoires' strategic commitment to green finance, I contributed to the digital transformation and ESG integration of investment processes, particularly for renewable energy projects (wind, solar, etc.) financed through private equity and loans. My role focused on aligning financial assets with the European Green Taxonomy and broader sustainability regulations, while also supporting the design and deployment of digital solutions to streamline ESG data management.

Key Responsibilities & Achievements:

- Green Taxonomy and InvestEU financial guarantee deployment:
  - Led the evaluation of sustainability alignment for energy infrastructure projects (e.g., wind farms, photovoltaic installations) financed by Banque des Territoires.
  - Assessed eligibility and alignment of financial assets to the EU Green Taxonomy,, and InvestEU financial guarantee.
  - Developed methodologies for classifying "targeted" vs. "non-targeted" assets and calculating alignment ratios.
- Digital Transformation & Data Strategy:
  - Collaborated with IT architects and data teams to design and implement digital tools for ESG data collection and reporting.
  - Defined and prioritized use cases for taxonomic data, improving traceability and auditability of ESG metrics.
  - Contributed to the development of native digital products supporting taxonomy compliance.
- Business Analysis & Agile Delivery:
  - Participated in the full project lifecycle—from framing and scoping to deployment and reporting.
  - Drafted functional specifications, user stories, and acceptance criteria in alignment with SAFe and V-cycle methodologies.
  - Facilitated workshops and agile ceremonies (PI Planning, ART Syncs, retrospectives) to ensure stakeholder alignment and delivery efficiency.
- Stakeholder Engagement:
  - Acted as a liaison between business units, ESG experts, data owners, and IT teams to ensure coherent implementation of sustainability requirements.
  - Provided continuous support to business users, translating regulatory requirements into actionable digital features.

CRÉDIT AGRICOLE S.A.

May 2022 - December 2023

Strategy Senior Mission Manager in leading banking group (reporting to Chief Strategy Officer)

- Analysis and recommendations for business cases pertaining to strategic initiatives (Make or Buy strategy, partnerships, digitalization):
  - **Generative AI application proof of concept for financial reporting optimization, competitive analysis, and financial data extraction (Llama 2, GPT, RAG)**
  - Redesign of the MRH Private Insurance Pathway (iARD)
  - Analysis of scenarios for the development of services related to crypto-assets for the COMEX group:
    - Cryptocurrency services: Conservation, Buying and Selling, Transfer, Tax assistance and crypto IFU, distribution of physical and synthetic cryptocurrency ETFs.
    - Tokenization of financial assets: revenue potential, potential partners, impact on the traditional securities framework, PSAN license.
- Monitoring of the medium-term strategic plan: Strategic oversight of two entities: BforBank (retail banking) and CACEIS (asset servicing).

Boursorama Banque
